

INFORMATION AND DECISION SCIENCE

An IDS major combines information systems/technology with operations management/operations research and statistics to prepare graduates for a variety of careers ranging from actuary researcher to quality control manager and from financial reporting to software consulting. Students develop logic and business skills needed for effective decision-making.

Courses may include:

- Business Applications Programming
- Management Science
- Statistics for Decision Making
- Global Operations and Supply-Chain Management
- Data Base Management and Decision Support Systems
- E-Commerce and E-Business Technology
