

Computer Science and Mathematics majors at Valparaiso University have a wide variety of interests. Besides studying for this major, they have second majors and minors that they study and they are involved in many different campus organizations. The following 'snapshots' of some of our current majors give a sense of the breadth of their interests.

### Kelly Roth

Major(s): Computer Science Minor: Mathematics Graduates: 2010

Why did you choose to be a computer science major? I became interested in computers at a young age and I started to do webdesign. When I was trying to figure out what I wanted to major in, computer science seemed fitting to my interests and also seemed to provide several great career options.

What are your career plans after graduation? Use my computer science education to obtain a successful career in some field that interests me. What extra-curricular activities do you participate in at Valpo? Kappa Delta, Green Peas

Jenny Reusz Major(s): Secondary Math Education Minor: Music, CC Associate Graduates: 2009 Why did you choose to be a mathematics/secondary education major? I chose to be a math major because I have always really enjoyed solving math problems. I like math because you can always get the right answer (theoretically), and because it is a collaborative subject. I also like math because everything connects and it is beautiful! What are your career plans after graduation? To be a high school math teacher. What extra-carricular activities do you participate in at Valpo? VU Chorale, dancing, theatre, St. T's Groupie.

David Beck Major(s): Electrical Engineering/Mathematics Minor: Chemistry Graduates: 2010 Why did you choose to be a math major? I am a very logical thinker. Topics of math are interesting and go hand-in-hand with electrical engineering. What are your career plans after graduation? Either practice electrical engineering or go to grad school for electrical

## Chris Wagner

Major(s): Physics, Mathematics Graduates: 2009 Why did you choose to be a math major? I enjoy math. I like solving problems and puzzles. What are your career plans after graduation? I plan on going to graduate school for physics.

What extra-curricular activities do you participate in at Valpo? Society of Physics Students.

Harry (Buddy) Boskamp

Major(s):  
Math and Secondary Education Minors: Liberal Arts in Business, Applied Statistics  
Graduates: 2010 Why did you choose to be a math major? Because I really enjoyed all of my math courses in high school. What are your career plans after graduation? Hopefully find a teaching job for the following semester at a high school. What extra-curricular activities do you participate in at Valpo? I am in Alpha Phi Omega
