

Valparaiso University Professional Licensure and Certification Disclosure

Federal regulations require VALPARAISO UNIVERSITY to publicly disclose, for each educational program designed to meet the educational requirements for a specific professional license or certification required for employment in an occupation (or advertised as meeting those requirements), information about whether program completion would meet those requirements in a state. These public disclosure requirements apply to all programs, regardless of their modality.

Valparaiso University participates in the National Council for State Authorization Reciprocity Agreements (NC-SARA) to offer distance education programs. NC-SARA requires the university to meet all disclosure requirements for all courses or programs designed to meet professional licensure or certification.

All current and prospective students are encouraged to contact the applicable licensure/certification boards in their respective states for additional information regarding professional licensure/certification requirements, including, without limitation, information regarding any non-educational requirements (such as work experience, background clearance, or examination by outside entities, such as bar examinations).

The information below should not be construed as guaranteeing that any particular professional licensure/certification authority will approve a student's application; nor should the information below be read to imply that other requirements for professional licensure/certification do not exist or that other requirements for professional licensure/certification have been determined to have been met by Valpo's program/course, or that any necessary approvals for clinical or other experiential learning placements are secured by virtue of a student's enrollment at the university.

State professional licensure/certification requirements are subject to change at any time.

The tables below provide information on Valparaiso University's determination if a program meets the educational requirements for licensure in a state, commonwealth or US territory. There are often additional requirements (residency, experience, examinations, etc.) required by a state/territory. Students interested in a licensed program where the university has not determined if it meets the requirements for a state should start by contacting the department chair or program head. This individual will be able to assist the student with finding the current contact information for the applicable licensure/certification board in each state.
